BADGE responses to the Questions received via **BADGE.Grants@tetratech.com**
Questions Due Date: April 23, 2022
BADGE Response date: April 28, 2022

SI	Questions received	BADGE Responses
1	We are getting problem in DUNS Registration	The U.S General Services Administration (GSA) has recently announced that the DUNS Number has been removed and replaced with the Unique Entity ID. It is now the identifier of record for all entities in the Integrated Award Environment (IAE) systems. Therefore, you need to obtain a Unique Entity ID instead of DUNS number. Please note that we have already uploaded the revised Attachment-D on the **www.bdjobs.com.** with this new requirement.
2	I have applied personally but we may be able to execute it through [XXX organization] and with its members. Is it possible?	Applications are accepted only from entities that are in compliance with sub-*section 5 and sub-section 6* under the **Section II. Award and Eligibility Information** in the RFA.
3	Number of questions received on various concepts. Can funding be offered for these projects?	Please refer to the sub-section **PURPOSE OF THIS RFA** under the **Section I. Funding Opportunity** at the page # 7 and page # 8 of the RFA. The section provides the broader thematic areas, which are envisioned to be funded by this grant.
4	We are writing this email from a well-established consultancy firm in India. We are willing to work on this project as we are involved in a lot of work in Bangladesh with our local partners. Therefore, our query is if we can form an association or any kind of legal collaborative partnership with local agencies for this USAID BADGE project.	Please note the BADGE response against the Question # 2.
